There were two known issues with the recording of the Chirk 10K at the finish line; On the numbers sheet in position 72 two race numbers were recorded which potentially put the numbers and times one place out of step, (Both places have been allocated the same time). On the time recording sheet no time was recorded against position 141, this on top of the other number record error will now potentially put the times 2 places out of step as there are now 2 more numbers than recorded times (Position 141 has had a time recorded the same as position 140)
